

Owner: Waste Management of New York

Project Name: Review Avenue Solid Waste Transfer Station

Services: Savin will be providing preliminary through final design and permitting services for an intermodal solid waste transfer station to be built by Waste Management of New York in Long Island City, NY. The transfer station will containerize 2100 tons per day of New York City solid waste for shipment by rail to out of state landfills. The design is to incorporate sustainable design principals and will seek to achieve a LEED rating.
